

Aggregate Behavioral, Environmental and Health Status Data

H4 Technology's COMPASS solution is cloud-based population health management solution for behavioral health organizations. COMPASS aggregates critical behavioral, environmental, and health status data points from EHRs and other systems, then turns this data to intelligence through a sophisticated business intelligence tool for monitoring and reporting outcomes.

- Population Health Management for Behavioral Health Consumers
- Real Time Access to Data Affecting Healthcare Performance
- Maximize Reimbursement for Value-Based Care Contracts
- Track Consumer Outcome Measures, Service Utilization, Cluster mix, Emergency Services, NOMS, Readmissions, plus much more
- Integrated Assessment Tools
- Dashboards and Reports for Monitoring State/Federal Reporting Requirements
- Self Service Tools to Easily Visualize Data
- Flexible data model to easily add elements as your organization changes
- Analyze Consumer Assessments, Demographics, Health Status, Trauma History, & Diagnosis
- Capture Housing, Crisis Response, Emergency Services, Wait List, & System of Care

Encounter Management and Mobile Assessments
